from the in-house photovoltaic system supply the production and storage facilities.

### **EXTRAORDINARY IDEAS. INTELLIGENT SOLUTIONS. SUSTAINABLE THINKING.**

Breaking new ground without losing grip. Thinking ahead and keeping an eye on the essentials: With this approach, KÖHL GmbH from Rödermark in Hesse has built up an exceptional reputation in the market since 1976.

Time and again, the company has succeeded in setting new trends with technical or design innovations, for example with the patented KÖHL AIR-SEAT technology or in the form of designs that have won the German Design Award. With its core values of responsibility and passion as well as credibility and creativity, KÖHL repeatedly bridges the gap between its commitment as a traditional company and a start-up mentality.

Safe workplaces and measures to protect the environment are firmly anchored in the company as key principles. Both together demonstrate our passionate commitment to corporate and social responsibility.

### **FOCUSED ADDITIONS TO THE PORTFOLIO**

On October 1, 2023, the Hessian office seating manufacturer KÖHL took over the product range and brand of the company ONGO from Sindelfingen. As a result, KÖHL is expanding its own portfolio with a well-established range that primarily meets the increased demand for office furniture for agile working concepts. In addition to production, the manufacturer is also responsible for the entire marketing of ONGO products in Germany and abroad.
